SUMMARY

React Developer with 2+ years of experience building responsive, client-facing web applications with React.js, Next.js, JavaScript and TypeScript. Cut API response time by 25% by optimising REST and GraphQL APIs. Hands-on with Redux Toolkit, Tailwind CSS, Node.js APIs, JWT/RBAC and CI/CD in Agile teams.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- **Frontend:** React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, FastAPI, Flask, REST APIs, GraphQL, WebSockets (SignalR), Microservices
- **Security & Testing:** JWT, RBAC (role-based access control), OAuth2, Keycloak, Vitest
- **Cloud & DevOps:** AWS (Lambda, ECS, API Gateway, S3, RDS, CloudWatch), Azure, Docker, Nginx, GitHub Actions, Cloudflare, Vercel
- **Databases:** PostgreSQL, MySQL, Redis, TimescaleDB, TypeORM, Prisma
- **Tools & Practices:** Git, Jira, Agile/Scrum, Data Structures & Algorithms

EXPERIENCE

Software Engineer | Magpii Innovations | Nov 2025 – Present

- Develop full-stack features for an Industrial IoT and Digital Twin platform and an AI-powered Education Management Platform, delivered in Agile sprints.
- Built .NET microservices with SignalR, handling 10,000+ concurrent events/sec at sub-100 ms latency.
- Built REST APIs with pagination, search and RBAC across 12+ modules of a live education platform.
- Onboard clients by turning requirements into configurations and features; resolve live production issues.

Junior Software Developer | Comorins Technologies | Mar 2025 – Oct 2025

- Cut manual showing coordination and booking conflicts with client self-booking and optimised scheduling logic.
- Improved SEO and load speed with server-rendered Next.js pages for an AI-powered real estate platform.
- Improved client engagement with AI-powered follow-up automation in Python; secured APIs with JWT/RBAC and shipped to Vercel via GitHub Actions CI/CD.

Junior Software Developer | Devaxcel Tech Pvt. Ltd. | Sep 2024 – Mar 2025

- Cut API response time by 25% by optimising GraphQL and REST APIs, and built React, TypeScript and Redux Toolkit features for a live HealthTech platform.
- Managed PostgreSQL migrations, indexing and TypeORM queries; deployed to AWS Lambda via GitHub Actions.
- Built and maintained order-related Node.js microservices in a 28-service backend, scaled independently.

PROJECTS

Enterprise Industrial IoT & Digital Twin Platform | React 19, .NET 8/9, ASP.NET Core, SignalR, PostgreSQL

- Enabled real-time asset monitoring across plants with 7+ ASP.NET Core microservices and a React 19 cockpit.
- Cut multi-hop graph queries by 45% and sped up time-series aggregations 3x by combining Apache AGE and TimescaleDB in one PostgreSQL data tier.
- Cut client deployment time from 3 weeks to 2 days with a metadata-driven UI configured through JSON schemas; secured with Keycloak and tested with xUnit and Vitest (85%+ coverage).

AI-Powered Education Management Platform | React, Next.js, Node.js, PostgreSQL, AWS ECS

- Delivered features across 12+ modules for schools, colleges and universities, keeping data consistent across timetables, assignments and quizzes with class-wise subject integration.
- Resolved API and data compatibility issues by migrating from Prisma/MySQL to raw PostgreSQL queries.

HealthTech App – Digital Healthcare Platform | React, Node.js, PostgreSQL, GraphQL, AWS Lambda

- Processed 10,000+ daily orders on a live platform for medicine purchases and digital prescriptions, with staged verification.
- Automated order processing and delivery-readiness workflows with AWS Lambda, cutting manual handling.

EDUCATION

Bachelor of Engineering (B.E.) | University College of Engineering, Nagercoil | 2019 – 2022
