SUMMARY

React Developer with 2+ years of experience building responsive, scalable, client-facing web applications with React.js, Next.js, JavaScript and TypeScript. Cut API response time by 25% by optimising REST and GraphQL APIs. Hands-on with Redux Toolkit, Tailwind CSS, Node.js APIs, JWT/RBAC authentication and CI/CD in cross-functional Agile teams.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- **Frontend:** React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, FastAPI, Flask, REST APIs, GraphQL, WebSockets, Microservices
- **Security & Testing:** JWT, RBAC, OAuth2, Jest, PyTest
- **Cloud & DevOps:** AWS Lambda, Docker, GitHub Actions, CI/CD, Cloudflare, Vercel
- **Databases:** PostgreSQL, MySQL, MongoDB, TypeORM
- **Tools & Practices:** Git, Jira, Agile/Scrum, Data Structures & Algorithms

EXPERIENCE

Software Engineer | Magpii Innovations | Nov 2025 – Present

- Build client-facing features with React.js, Node.js and Express.js, turning business requirements into working features in Agile sprints.
- Design and maintain REST APIs that connect application components and support system integrations.
- Troubleshoot and resolve application errors across workflows to keep production features stable.
- Work with cross-functional teams and onboard clients by converting their requirements into configurations and features.

Junior Software Developer | Comorins Technologies | Mar 2025 – Oct 2025

- Built server-side-rendered web applications with Next.js and TypeScript.
- Developed Node.js REST APIs secured with JWT authentication and role-based access control (RBAC).
- Developed AI-powered automation features and application workflows in Python, automating selected tasks to streamline processes.
- Supported CI/CD pipelines using GitHub Actions and Vercel for application releases.

Junior Software Developer | Devaxcel Tech Pvt. Ltd. | Sep 2024 – Mar 2025

- Optimised REST and GraphQL APIs and developed React.js features in TypeScript, cutting API response time by 25%.
- Managed PostgreSQL migrations, indexing and secure queries for efficient data retrieval.
- Built Docker-containerised microservices and deployed backend functions on AWS Lambda.
- Supported CI/CD pipelines and system integration for application releases.

PROJECTS

Enterprise Industrial IoT & Digital Twin Platform | .NET 8/9, ASP.NET Core, React 19, Azure, Docker

- Designed and deployed 7+ Docker microservices on Azure Container Apps for telemetry ingestion, graph models and caching.
- Streamed 50,000+ telemetry points/sec at sub-80 ms latency (SignalR WebSockets, Azure Event Hubs); cut graph query latency 42% with Apache AGE on PostgreSQL.
- Built a low-code React 19 + Redux Toolkit cockpit that reduced dashboard configuration deployments by 80%; Azure DevOps GitOps pipelines with Trivy scanning kept releases under 12 minutes.

HealthTech Platform | React.js, TypeScript, Node.js, PostgreSQL, AWS Lambda

- Built order-management workflows supporting 10,000+ daily orders; automated backend tasks with AWS Lambda.
- Implemented JWT authentication and RBAC, and integrated REST and GraphQL APIs with microservices.

Learning Management System | React.js, Node.js, REST APIs

- Built responsive learning modules and REST APIs for course management and dashboards.
- Debugged issues and supported deployment and integration with QA, UI/UX and product teams.

EDUCATION

Bachelor of Engineering (B.E.) | University College of Engineering, Nagercoil | 2019 – 2022
